A POP OF
POSITIVE **VIBES**
FOR ANY SPACE

STORY

Candys shock is the light of L10, the Italian company that supplies coolness all over the world.

We consider it the handkerchief in our pocket, the precious texture on the porcelain plate, it's when you see Mars when staring at the starry sky.

Candys shock was conceived during a trip to Hong Kong in 2019. We were travelers in a foreign country, where we barely knew the language but were eager to discover innovations (and eat noodles). Every night we explored the city until we fell in love with a neon sign outside a restaurant. Nobody knew what it meant, but we wondered if the restaurant, without that detail, would have had the same energy.

And all of a sudden, a flash... so to speak!

Why couldn't we create details too? Why couldn't we create personality pills that would change the characteristics of an environment with the simple movement of the finger: ON - OFF? That was precise moment we thought of Candys shock, we barely mentioned it and the name wasn't this, but the energy was the same. Once in Italy we already had many designs in mind; we didn't want to be mainstream, but at the same time we wanted to be top of mind for the people

while getting to know them.

Candys shock comes into the world, the LED sign that believes to be a neon: safer, easier and definitely more trendy. For us, an empty wall is like a canvas waiting to be decorated. **With Candys shock's signs you say something about yourself without speaking, you show your personality with a light touch.**

Our concept gets straight to people's hearts, so much so that while the signs were still under development, the first orders had already arrived. Now it's a still growing reality, ready to enlighten people's lives with style and eccentricity.

Blank walls are like a canvas waiting to be decorated: with Candy Shock lights you can make the most out of your empty wall space. Make your favorite neon centerpiece or create beautiful compositions with paintings, photos and objects to make your room unique, bright and colorful!

MATERIAL

For Candy Shock lights we use a special **silicone LED tube and a shaped plexiglass panel as a support**. Unlike neon lights, they are not made of glass, they don't contain gas or mercury, they don't produce heat, don't emit nor contain harmful substances and are maintenance free.

We only use high quality materials that comply with industry standards. All our products are handmade, safe for children, cheaper and more ecological than traditional neon lights. They are already equipped with holes for quick assembly, they are resistant and easy to clean. Therefore, you can place your neon anywhere you want, without worries!
